

# Waynesboro Community Garden Workshop

Wednesday, February 28, 2024 · 1–4 pm  
Waynesboro, Virginia · **FREE**

Community gardens are a gateway for improved nutrition, health, and enjoyment. Planning, preparation, production, and harvest issues must be coordinated for a thriving community garden. Good management practices, including using soil amendments, cover crops, crop rotation, and irrigation are vital to the success of a community garden. The Embrace Community Garden is up and running and has several raised beds. We will explore the efficiency and cost-effective advantage of trickle irrigation systems in small raised-bed garden settings.
