

# Precision Agriculture in Virginia

**Wednesday, January 17, 2024 · 9 am–noon**  
**VSU Randolph Farm Pavilion, 4415 River Rd, Petersburg, VA**  
***FREE* · Space is limited to 30 participants.**

Farmers and Growers will have the opportunity to learn about the different aspects of managing their farm field by field and intra-field by using multiple inputs that occur during the growing season up through post-harvest, along with the aids to farmers that make the decisions easier to make, such as precise soil testing locations to determine intra-field variables, disease or pest test results, or pre-side-dress nitrate testing, which will reduce variability in yields and increase farm profits.
