

Soil Testing

Thursday, November 16, 2023 · 10 am–noon
Virginia Beach, VA · **FREE**

Soil is a farm's most precious natural resource. Testing the soil is the first step to unlocking its full potential. Tammy Holler, Nutrient Management Specialist with the Small Farm Outreach Program, will discuss the importance of soil testing to determine the necessary amendments to soil for a successful growing season. She will discuss reading and understanding the test results and the steps to follow for productive yields. Cory Hoar, Conservation Specialist with Virginia Dare Soil & Water Conservation District, will discuss the role of his organization and several S&WCD programs. A hands-on sampling in a predetermined area will take place at the end of the workshop to show the step-by-step process of soil testing for a paddock in preparation to support a small herd of Angus & Angus-Hereford cross cattle.
